

*Continuous monitoring of plant and machinery*

- is economical*
- is simple*
- requires no experience*

**Condition monitoring products**  
*for rotary components*

## **FAG Easy Check** **FAG Easy Check Online**

With Easy Check vibration detectors, we offer you a cost-effective and high quality solution.

Easy Check products can be used for continuous monitoring of all machinery running under stable operating conditions, such as:

- ventilators
- fans
- pumps
- electric motors

*"Want to know about other FAG maintenance products and services? Just ask for a catalogue!"*

## If you want:

- an easy to use vibration detector
- to see the condition of your machinery at a glance
- early warning of component damage
- advance warning of bearing failure
- continuous, reliable monitoring of your machinery at a low price

**... then the ideal choice is a vibration detector from the Easy Check range:**

### Version Easy Check

Battery-operated standalone solution

### Version Easy Check Online

Solution with external power source and alarm outputs

## The advantages for you:

- simple fitting and handling
- continuous vibration and temperature monitoring
- increased planning reliability through advance warning of bearing failure
- extended bearing life
- considerable cost savings
- suitable for use in conjunction with an automatic lubricator

### In addition, Easy Check Online offers:

- monitoring of machinery in difficult to access locations (e.g. fans for flue gas plant)
- display using a "traffic light" system or at a control station
- monitoring of machinery running at low speeds (minimum 100 rpm)
